

# Overview

## Barn Swings Project

We are looking for an individual who is willing to draw up plans for a recreational facility that has only been done twice. The goal is to create a recreational facility that will house 10-12 swings that will suspend from the ceiling and be able to hold a decent amount of weight. People will stand on a platform, put the swing around them and take a running jump off to swing in a circular motion for 30 seconds to a minute.

There are two facilities that we know of in the United States and one of them has given permission to use them as an example. This facility is the actual pilot facility and the owner came up with the “barn swing” concept.

The location of this project will be in Maury County just outside of Spring Hill, TN.

The land we are considering for this project is a 68 acre undeveloped plot of land.

We are extremely limited on funds so we are looking for someone who would be willing to do this project at no charge. This will be a project that will allow you to think completely outside of the box and let your light shine. We will be an excellent reference for future employers!

## Who are we looking for:

- Someone who is resourceful
- Attention to detail
- Ability and desire to build a green facility
- Someone who can think outside of the box and creative
- Someone who will get the job done quickly and efficiently

## Timeline:

- This project is estimated by another engineer to take 120-160 hours
- We are needing it completely finished by July 15, 2014 or sooner

## What the facility includes:

- Large multi room facility
- Metal sided
- Two party rooms
- One café with seating
- Ticket Booth
- Office
- Small lounge area
- Apartment upstairs
- Two large rooms with 5-6 swings in each room
- Area for one large structured mega swing

## Swing Rooms:

- 5-6 different size swings in each room
- Catwalk or platforms that can be used one each side for a swing on both sides
- 2 large swings, 1-2 medium swings and 2 small swings (that can be used for little kids up to adults)

We have a friend who is a structural engineer who is willing to help with the structure and weight limits

## Party Rooms:

- Two party rooms right across from each other
- Must be able to fit 40-45 people in each room
- Long in length
- Concrete floors

## Café:

- Concession style café
- Built in cooler and storage room
- Needs to be able to fit 8-10 people comfortably
- Concrete floors
- Built in plumbing for sinks

We will be serving ballpark type food so it needs amenities like a concession stand

## Office/Ticket Booth:

- Office needs to be 12x12
- Ticket booth entrance inside of office

## Restrooms:

- Men and Woman bathrooms
- 3 stalls in each restroom
- 2 sinks in each restroom
- Baby changing station in womans restroom
- Would like a separate small room with two chairs for nursing mothers

## Lounge:

- 20x20 room that will have a couple couches and some chairs

## Apartment:

- 3 bedrooms
- 2 full baths
- Open floor plan
- Split level
- Laundry room or closet
- 1200 square feet. Negotiable

Apartment needs to go over café/party rooms/office/lounge

We understand that this is a **HUGE** undertaking but this will be a very exciting and rewarding project to be a part of!

Thank you to all who even consider being a part of making our dreams possible!

Sincerely,

Will and Amanda

Root
